

Rough sleeping in a tent?

*Keep your tent away from fire.*

Smoking or having a BBQ, campfire, or candle inside your tent can cause carbon monoxide poisoning, and is a fire risk.

If you are rough sleeping and would like some support, visit [TheStreetLink.org.uk](https://www.thestreetlink.org.uk), or email [outreach@preston.gov.uk](mailto:outreach@preston.gov.uk)
